ASSESSMENT REQUIREMENTS

NOTE: the following tasks and weights apply to Monash students. FIRN students outside Monash are only required to sit the final exam.

Assessment Task 1: Presentations

Weighting: 15%

Date: at the end of each Lectures 1-5 and 7-10

Task details:

For specific lectures (see schedule above) one paper will be scheduled for discussion in the 3rd hour of the lecture. One student will be asked in advance to prepare a short presentation of the paper (15-20 minutes) and that presentation will be followed by a group discussion of the paper (what do we learn from the paper? What are the major strengths and weaknesses of the paper?, etc.). This presentation itself will be part of the evaluation. In addition, the evaluation will be based on the discussion part. Students will be assessed on the extent to which they demonstrate that they have completed the assigned reading prior to attending

class together with the ability to demonstrate that they have thought through the topic and the issues associated with it.

Learning outcomes assessed: 1 and 2.

Assessment Task 2: Working paper presentation and discussion

Weighting: 15%

Due date: Weeks 6 and 12

Task details:

Lectures 6 and 12 will each consist of two working papers. For both papers, students will be divided in two groups: one group presents and discusses the paper (the defenders) and the other groups critiques the paper (the attackers). After the first paper, the groups change roles for the second paper.

The defenders are required to give a 30-minute presentation of a working paper (to be assigned). This presentation is a group project, since 2-3 students will prepare the presentation and present the paper together.

The attackers prepare together a 20-minute discussion of the paper. Also, this discussion will be a group project, because the students will prepare the discussion and present it together.

The defenders will then be given 15 minutes to reply to the discussion.

After both defenders and attackers have made their pitch, there will be group discussion (10 minutes).

Students will be evaluated as a group for each round (four rounds).

Learning outcomes assessed: 2 and 3.

Assessment Task 3: Referee reports

Weighting: 20%

Due date: End of Weeks 4 and 10

All students will be required to hand in two referee reports for two different papers. The papers will be distributed at the beginning of Weeks 3 and 9 and they will be due by the end of Weeks 4 and 10 (the Sunday after Weeks 4 and 10 at 23.59 pm).

The referee report for Week 3 will be on the paper: Merkoulova, Yulia and Veld, Chris: "How did Covid-19 affect stock market participation", Working Paper, Monash University, July 2023 (to be distributed).

The referee report for Week 9 will be on the paper: <u>Barahona</u>, Ricardo and Cassella, Stefano and Jansen, Kristy A.E., "Do Teams Alleviate or Exacerbate Biased Beliefs? Evidence from Extrapolation Bias in Mutual Funds" (https://ssrn.com/abstract=3783421).

Note that these referee reports are individual projects (so not group projects). Students are not supposed to discuss their reports with other students before handing them in.

Learning outcomes assessed: 2 and 3.

Assessment Task 4: Final Examination

Weighting: 50% (100% for FIRN students outside Monash)

Date and location:

This examination will be held during the official examination period. The examination timetable which provides full details of the examination schedule can be accessed through the my.monash portal.

FIRN students will receive the exam by e-mail at the same time as Monash students do the exam

Materials examinable:

Only papers and textbook parts that are described as "required reading" in the table in this document will be part of the exam. Papers discussed by students (and indicated as such in this document) will NOT be part of the materials for the final exam

Task details:

Open book exam of 2 hours (plus 10 minutes reading time)

Learning outcomes assessed: 1, 2 and 3.
